Declaration : I apply to the Fertiliser Quality Council to become, or to renew, approval as a Spreadmark Approved Spreading Equipment Tester.

I recognise that an important part of the Spreadmark scheme is the requirement for fertiliser spreading companies to have in place spreading machinery with performance characteristics certified by an approved tester.

I agree that upon being granted, or having renewed, approval by the Fertiliser Quality Council as a Spreadmark Approved Spreading Equipment Tester, I will:

- Abide by the provisions of the Spreadmark Code of Practice,
- Abide by such Rules, Protocols and Policies as are made by the Fertiliser Quality Council,
- Not to do anything inimical to the interests of the Spreadmark scheme,
- Ensure that all testing carried out that is to be used for Spreadmark test certificates will be done in accordance with the current Spreadmark Code test standard,
- Only generate certificates with the Spreadmark name or logo on them for fertiliser spreading companies which hold, or which have applied to hold, Spreadmark company registration,
- Allow reasonable access to testing by the Spreadmark Quality Auditor for monitoring, auditing or as a follow-up to any complaints that may be made, and
- Pay the Fertiliser Quality Council such audit fees as are due.

Further, I agree that if approval by the Fertiliser Quality Council lapses or is withdrawn, all mention of Spreadmark made in the company's publications or certificates, or any other use of the Spreadmark trademark, will cease.

Signed
